Nimbus Systems — Acquisitions and Expansion Strategy

Internal strategy memo · Synthetic test data

1. Overview

Nimbus Systems has grown partly through acquisitions. Since 2022, the company has acquired two smaller analytics and engineering firms to expand its product portfolio and geographic reach.

2. Acquisition of Polaris Analytics (September 2022)

In September 2022, Nimbus Systems acquired Polaris Analytics, a Berlin-based business intelligence startup. Polaris Analytics was founded in 2019 by Elena Volkov, who was serving as its CEO at the time of acquisition. Following the acquisition, Elena Volkov joined Nimbus Systems as Chief Data Officer, and the Polaris Analytics technology was integrated into the NimbusFlow platform to provide embedded analytics features.

3. Acquisition of Kite Labs (March 2024)

In March 2024, Nimbus Systems acquired Kite Labs, a Tokyo-based engineering firm focused on developer tooling. Kite Labs was founded in 2020 by Hiroshi Tanaka. After the acquisition, Hiroshi Tanaka was named Vice President of Engineering at Nimbus Systems. The Tokyo office became Nimbus Systems' Asia-Pacific engineering hub.

4. Strategic Rationale

The Polaris Analytics acquisition gave Nimbus Systems its first presence in Europe, while the Kite Labs acquisition strengthened its Asia-Pacific engineering capabilities and accelerated the developer tooling roadmap.

5. Key Facts

- September 2022: Acquired Polaris Analytics (Berlin, founded 2019 by Elena Volkov)
- March 2024: Acquired Kite Labs (Tokyo, founded 2020 by Hiroshi Tanaka)
- Elena Volkov became Chief Data Officer after Polaris acquisition
- Hiroshi Tanaka became VP of Engineering after Kite Labs acquisition
- Tokyo office is now the Asia-Pacific engineering hub
- Polaris acquisition gave Nimbus its first European presence
