Nimbus Systems — Leadership Biographies

For press and recruiting use · Synthetic test data

Dr. Maya Chen — Founder and Chief Executive Officer

Dr. Maya Chen is the founder and CEO of Nimbus Systems. Before founding Nimbus Systems in 2018, she worked as a research scientist at the MIT Media Lab, and prior to that she completed her PhD at Stanford University. Her research focused on human-computer interaction and workflow automation.

Raj Patel — Chief Technology Officer

Raj Patel is the Chief Technology Officer of Nimbus Systems. Before joining Nimbus Systems, he spent six years at Google as an engineering director, where he led teams building developer platform infrastructure.

Elena Volkov — Chief Data Officer

Elena Volkov is the Chief Data Officer at Nimbus Systems. She was previously the CEO and founder of Polaris Analytics, a Berlin-based business intelligence startup that Nimbus Systems acquired in September 2022.

Hiroshi Tanaka — Vice President of Engineering

Hiroshi Tanaka is the Vice President of Engineering at Nimbus Systems. He founded Kite Labs in Tokyo in 2020, which Nimbus Systems acquired in 2024. Prior to founding Kite Labs, he worked as a senior engineer at several Japanese software companies.

Board and Advisors

The Nimbus Systems board includes representatives from Meridian Ventures, the lead investor in the company's Series C round. Additional independent directors bring experience in enterprise software and global operations.
